IRE-PROOF CONSTRUCTION.—

The attention of those who are interested in building is ed to an improved method of constructing the FLOORS, ILINGS, and ROOFS of Buildings, whereby they are rendered E-PROOF, at a cost not exceeding that of the ordinary timber

n this system timber joists are wholly superseded, their place ng supplied by either wrought or cast-iron, at the option of the son adopting it; and the floors are formed by successive layers incombustible materials, finishing with a boarded, cement, or er surface. Any required degree of strength is readily ob-ned, and there is an entire freedom from the LATERAL RUST, inseparable from the use of brick arches; security is afforded from DRY-ROT, and from the ravages of insects and min.

e value and economy of this system have been fully proved by extent to which it has already been adopted, and the great iety of buildings to which it has been applied. These include—

ivate Mansions, Dwelling-houses, Offices and Chambers,
blic Exhibition-rooms, Schools & Training Institutions,
Hospitals, Workhouses, and Lunatic Asylums,
Warehouses, Granaries, Mills, &c. &c.

A full description of this improved method of building, and all her information in reference to it, may be obtained on appli- to the Proprietors of the Patent,

Messrs. FOX and BARRETT,
12, York-buildings, Adelphi, London.

ese offices form part of a building erected upon this principle.

EXHIBITION PRIZE MEDAL!—

RANSOME and PARSONS beg to draw the attention of Architects, Builders, and others, to their PATENT STONE, which, in its composition, differs essentially from all other artificial productions for a similar purpose. Flint forming the basis in character, texture, and appearance, it is made to resemble every kind of natural stone, at pleasure, from the finest marble to the coarsest sandstone, and to possess all their valuable and enduring properties, without being liable to any of their defects. It is especially applicable to all kinds of architectural decorations and mouldings, fountains, balustrades for terraces, vases, and pedestals, &c. &c., also for all varieties of plain and ornamental flooring. In price it is far below the cost of any natural product, and, in many cases, can be furnished as low as ordinary cement. Copies of Busts, Statuary, or other Works of Art, can be produced in the finest Patent Stone as faithfully as in Plaster of Paris.

IMPORTANT TO WATER COMPANIES, MANUFACTURERS, AND THE PUBLIC.

Ransome and Parsons beg to call the attention of Water Companies, Manufacturers, and others to their

PATENT STONE FILTERING SLABS,

which are capable of filtering from [illegible] to [illegible] gallons of water per superficial foot per day, with a head of water varying from [illegible] to [illegible] feet. These slabs can be produced to any required dimensions, and, consequently, can be adapted to any cistern, tank, or reservoir. By a simple precautionary arrangement they are protected from being in any way choked or impeded in their action. Price [illegible] per superficial foot.—Full descriptions and prices of their other descriptions of Filters will be supplied on application.

IMPORTANT TO BRICKMAKERS AND CONTRACTORS.

Ransome and Parsons are also the Proprietors of

HALL'S PATENT BRICK-MAKING MACHINE,

capable of moulding [illegible] Bricks per day and upwards, which are superior to those manufactured by hand, and are produced at considerably less cost.—Communications to be addressed to the Patentees, Messrs. RANSOME and PARSONS, [illegible], Ipswich.
